1230 York Avenue
New York City, NY 10021
Professor Joshua Lederberg

Dear Dr. Lederberg:

I am happy to welcome you, as a member of our National Advisory Committee, to the BIONET Resource. Your BIONET starter kit is enclosed. Please read the enclosed letter, "Dear BIONET Principal Investigator", which contains important startup information.

To log on the BIONET computer via telenet, please refer to Chapter Two in the Introduction to BIONET. The telenet password is 045526.

Your local Telenet access nodes for New York City are:

| | | | | |
|---------------|-----|----------|---------------------|------------------|
| | | 300 baud | 1200 baud | <i>cu bionet</i> |
| New York City | 212 | 736-0099 | 785-3860 | |
| | | | 741-4950, 8000 | |

Unless you have previously logged in and changed your password, your personal username is <LEDERBERG> and your password is BIONET84. You should log in as soon as possible and change your password.

To dial the BIONET computer directly, we have established a hunt group telephone number - (415) 853-3007. This number will automatically try the other available direct dial numbers in the case this one is busy.

For an explanation on Electronic Community Bulletin Boards, please see Chapter Eight in the Introduction to BIONET. Your BIONET account includes you on all of the available bulletin board topics.

The BIONET staff will now be communicating with you and other NAC members primarily on the BIONET computer. Please read your electronic mail on BIONET for BIONET related issues. We will still backup our communication with you on SUMEX, but there may be a slight delay because SUMEX will be the alternate machine.

If you have any questions, please call us at either (415) 328-4870 or the BIONET consultant line (415) 324-GENE.

Sincerely,

Liz Martin
Administrator
